

DOTLAKE INDUSTRIAL SECTOR

Whitepaper

DOTLAKE IN INDUSTRIA SECTOR

In the era of digitalization and automation, the industrial sector has been significantly transformed to take advantage of **technological advancements** and **improve operational efficiency**. However, this increasing reliance on technology has also increased **exposure to cyber threats** that could have devastating impacts on security and the economy.

Spain is the fourth country in Europe with the most attacks on the industrial sector, with 26.3%, behind Portugal, Estonia and Latvia.

What is **Dotlake**?

Dotlake is a cyber intelligence solution that is responsible for **automatically** collecting information from the open and deep web, including **ransomsites, fraud markets, Telegram groups and channels**, and the most important **cybercriminal forums** on the market.

SolarWinds

2020

The attackers compromised SolarWinds software updates, allowing them access to numerous government and private organizations.

Hyundai y Mitsubishi Electric

2020

These companies suffered from having their internal networks compromised, as well as confidential company information and intellectual property.

Colonial Pipeline

2021

A major pipeline network in the US suffered a ransomware attack that resulted in the interruption of fuel distribution on the East Coast.

How can **Dotlake** help you?

- Detect **mentions** of your **brand**, **digital assets** relevant to your company or your **employees' credentials** in real time at the earliest stage of the threat with our automated alert system.
- **Access our portal** where you can in-depth investigate the data found, the **activity of cybercriminals** and **contextualize** the severity of the exposure.
- **Protect your intellectual property** by ensuring continuous production and maintaining customer trust.

And not only that...

With Dotlake you can also be informed of the latest tactics, techniques and procedures (**TTPs**), explore what vulnerabilities companies in your same sector suffer from (**Threat Hunting**), detect possible fraud and protect high-ranking people in your company...
